

Veeting Corporate

GDPR Compliant Video Conferencing and Collaboration with Your Own Brand

Bring Your Brand to Life in Video Calls

Corporate Branded Video Meetings

Amplify the Power of Your Brand

Veeting Corporate is a video conferencing platform fully white-labeled with your company's brand. Whether you're consulting customers, pitching your products, hosting webinars, virtual meetings or remote conferences, Veeting Corporate ensures that your brand is front and center.

Our feature-rich conferencing platform includes document sharing, screen sharing, whiteboards, text editing, polls, and high-quality audio and video. Different meeting room layouts, end-to-end encrypted meetings, boardrooms, and a TV mode for webinars make this web meeting platform an all-round solution for all the video conferencing needs with your customers.

You don't have to worry about data privacy issues. Our hosting services are located in Switzerland or can be self-hosted in your trusted data center. We never share your data with anyone.

AT A GLANCE

CORPORATE BRANDING

Give your customers a seamless experience with your own brand and domain name.

INTEGRATIONS

Use our web components and APIs to build on our foundation.

CORPORATE FEATURES

Satisfy your Business and IT Departments.

Corporate Branding

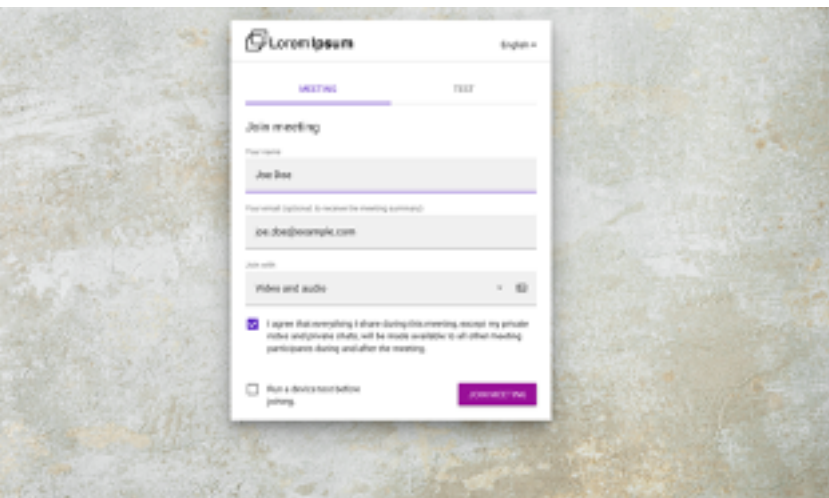

Our Platform with Your Brand and Domain Name

Video meetings are a crucial part of business communication, why not have your brand be a part of it? Showcase your professional side during video conferences and amplify the power of your brand.

Your brand is present on every invoice you send, every presentation you give. Your company name is in your web and email address, on your letterhead and your business card. Yet, only for video conferences, you're using third-party tools that don't do your brand justice.

Take the next logical step and present yourself professionally in video conferences too. Veeting Corporate brings your brand to life and makes video meetings a seamless extension of your corporate identity.

We re-brand our video conferencing solution completely with your logo, colors, and domain name. Our company is not mentioned anywhere on the platform.

Data Privacy

You Always Know Where Your Data

Veeting hosts its Veeting Rooms exclusively on servers located in Switzerland. We sign legally binding data processing agreements with customers to make sure everyone is GDPR compliant.

Partners who prefer to host their multi-tenant Veeting Rooms servers in their own data centers can make use of our on-premises and hybrid private cloud offerings. A Veeting Rooms setup is a closed system and does not depend on third-party services.

Feature Highlights

Collaboration and Conferencing

Work more efficiently online with a comprehensive collaboration platform. Speak, write, draw and present without losing focus. Veeting solutions are professional, effective and fun.

Schedule your meetings with the branded Office 365 integration and invite your customers to your corporate online offices.

Do you have multiple business units with their own unique branding? No problem, we can provide you with as many branded White Label services as you need.

Active Directory integration, Two Factor Authentication and Meeting Authorization Services protect meetings from unwelcome guests. Complete in-transit encryption and private cloud setups ensure that your data is secure.

Key Benefits

Maximize Your Meeting Experience

Branding: Make your video meetings stand out with Veeting Corporate. Just as you wouldn't send an invoice or product presentation without your brand, why settle for generic video calls? Veeting Corporate lets you customize your video meetings with your company's branding, adding a touch of professionalism and enhancing your marketing efforts.

Security: Veeting Corporate satisfies your IT and legal departments and lets you do business without any hassle. Complete in-transit encryption and private cloud setups ensure that your data is secure. As a web application no software downloads are required.

Services: We are a team of industry experts with a long history in real-time communication and integration projects. We support companies in successfully bringing corporate communication to the next level. When speaking to Veeting, you always speak to a professional who cares about your success.

Testimonials

Customer and Partner Comments

«Veeting Rooms with its innovative approach and use of WebRTC standards is the perfect fit for our product line. Now our clients can get together easily in virtual meetings.» *Business VoIP Provider*

«With Veeting, we have found a reliable partner for webinars and breakout sessions that meets our high data protection and data privacy requirements. The Veeting Rooms solution can be integrated easily into our products and software solutions of our partner. Their white labelling options are impressive.» *Integrator*

«Web meetings are an important element of our sales process. We were looking for excellent customer service, data security and an always up to date solution. Veeting Rooms provides all of this.» *Enterprise User*

Veeting AG

WebRTC Since 2014

Veeting was founded in 2014 in Zurich, Switzerland, with a singular vision: Enabling every company to have its own branded virtual meeting rooms and enjoy authenticated face-to-face communication and stress-free collaboration.

Today, the Veeting platform supports virtual co-working, customer relationships and remote collaboration around the world. We are committed to providing reliable software solutions that allow customers and partners to create and brand their own virtual meeting rooms as simply as possible with as many features as required.
