A Veeting Room for Every Use Case

Not all meetings are the same. You choose the most appropriate room for each of your meetings, whether you require end-to-end encrypted communication, a large group discussion, breakout rooms or a webinar.

Off-the-Record meetings are designed for maximum security. This specialized option leverages Peer-to-Peer technology to run secure, fully end-to-end encrypted meetings.

Leverage the power of large Boardroom meetings to include more perspectives in your discussion. If you wish, you can use the facility to record the conversation for later use.

Support greater impact with the one-to-many configuration of a Webinar. Allow multiple presenters to share information with a large audience in a live, virtual setting. Use the option to add interpreters for a multi-lingual experience.
