

## New Partnership for the Telecommunications Industry

### TeamFON Bets on the Innovative Web Videoconferencing Solution Veeting Rooms

Zurich, July 07, 2015. Web based business meetings that are as easy as a phone call: Effective immediately, German TeamFON, a leader in cloud based telephone systems, is offering “TeamFON Web Meeting.” A trendsetting, browser based videoconferencing solution, “TeamFON Web Meeting” does not require the installation of any special software. The service comes with an intuitive interface and a variety of features such as data exchange, live presentations and screen sharing. Thanks to WebRTC technology, its encrypted direct audio and video connections provide a high degree of security. In addition to being easy to use, TeamFON’s innovative service is available as an inexpensive monthly subscription or in the form of variable on-demand packages. TeamFON runs “TeamFON Web Meeting,” a white-label version of Veeting Rooms, from its own secure hosting facilities in Munich.

“Since our company’s beginnings in 2005, we have bet on cloud based telecommunications solutions and established ourselves as a leader in the field,” Thomas Weiss, Managing Director at TeamFON, says. “Veeting Rooms with its innovative approach and use of WebRTC standards is the perfect fit for our product line. Now our clients can get together easily in virtual meetings.”

Fabian Bernhard, the founder and CEO of Veeting AG, adds: “The collaboration with TeamFON underlines a strength of our product; with the white-label version of Veeting Rooms, our partners can provide an attractive web videoconferencing solution that is based on the most advanced standards. They can occupy an increasingly important segment in business communications, without having to pay for development.”

### **About TeamFON**

Advanced technology “Made in Bavaria”: Founded in 2005, TeamFON is on the cutting edge of cloud based virtual telephone systems and mobile IP telephony. The “TeamSIP Centrex” solution created by TeamFON offers comprehensive Unified Communications features and also integrates with back end systems (ERP, CRM and more.) ISO 27001 certified since 2014 and a Connect magazine test winner in June 2013, TeamFON delivers excellent communication quality even with a standard Internet connection. TeamFON solutions can scale to 100,000 extensions and may include high-end IP telephones as well as personal support and individual VOIP programming. They are distributed by partners in retail, systems integrators, carriers and cloud-distributors (Acmeo.) In 2015, TeamFON was recognized for its channel partner program by the magazine Channelpartner.

### **About Veeting Rooms**

Veeting Rooms is an innovative all-around solution for web-based conferences. Launched in 2014, the Swiss service provides virtual meeting rooms that offer all the tools necessary for efficient conferences, including online presentations, data exchange, whiteboards, shared screens and minutes. Thanks to our WebRTC technology, these comprehensive functions are just as user-friendly as the access to Veeting Rooms. Encrypted, highly secure audio and videoconferences are accessed directly in the browser and without the previous installation of software. Available in English and German, the service is compatible with all major PC operating systems as well as with Android for mobile. Veeting Rooms offers its clients great flexibility. The service is available on a subscription basis or in form of prepaid packages, and we provide white-labeling as well as full integration into existing software environments. No matter how — with Veeting Rooms, virtual meetings are as easy as a phone call.
